## GURU NANAK INSTITUTE OF TECHNOLOGY An Autonomous Institute under MAKAUT 2020-2021 FIELD THEORY (BACKLOG) EE302

## **TIME ALLOTTED: 3 Hours**

**FULL MARKS: 70** 

Marks CO No

The figures in the margin indicate full marks. Candidates are required to give their answers in their own words as far as practicable

**GROUP – A** 

## (Multiple Choice Type Questions)

Answer any *ten* from the following, choosing the correct alternative of each question: 10×1=10

|        |   | warks |     |
|--------|---|-------|-----|
| 1(i)   | The vector identity of $\nabla \times (\nabla \times \vec{A})$  | 1     | CO1 |
|        | (a) $\nabla(\nabla, \vec{A}) - \nabla^2 \vec{A}$  |       |     |
|        | (a) $\nabla(\nabla \cdot \vec{A}) - \nabla^2 \vec{A}$<br>(b) $\nabla(\nabla \times \vec{A}) - \nabla^2 \vec{A}$ |       |     |
|        |   |       |     |
|        | (c) $\left(\nabla \times \vec{A}\right) - \nabla^2 \vec{A}$   |       |     |
|        | (d) $\nabla \times (\nabla, \vec{A}) - \nabla^2 \vec{A}$  |       |     |
| 1(ii)  | The continuity equation for steady current is   | 1     | CO3 |
|        | (a) $\nabla \times \vec{J} = 0$   |       |     |
|        | (b) $\frac{\delta Q_v}{\delta t} = 0$   |       |     |
|        | (c) $\nabla . \vec{f} = 0$  |       |     |
|        | (d) None of these   |       |     |
| 1(iii) | Pointing vector has the unit of   | 1     | CO4 |
|        | (a) Watt  | _     |     |
|        | (b) Watt/ m   |       |     |
|        | (c) Watt/ $m^2$   |       |     |
|        | (d) Watt/ $m^3$   |       |     |
| 1(iv)  | For a lossless transmission line the characteristics  | 1     | CO4 |
|        | impedance is given by   |       |     |
|        | (a) $\sqrt{\frac{C}{L}}$  |       |     |
|        |   |       |     |
|        | (b) $\sqrt{\frac{L}{c}}$  |       |     |
|        | (c) $2\pi\sqrt{\frac{C}{L}}$  |       |     |
|        | $\sqrt{\frac{1}{L}}$  |       |     |
|        | (d) $2\pi\sqrt{\frac{L}{c}}$  |       |     |
| 1(v)   | Curl of a gradient of a scalar field results  | 1     | CO1 |
|        | (a) A scalar function with non-zero value   |       |     |
|        | (b) A vector function with non-zero value   |       |     |
|        | (c) A zero vector   |       |     |
|        | (d) A periodic function.  |       |     |

| 1(vi)   | The magnetic field strength $\vec{H}$ produced by a conductor carrying current I at a distance 'r' is | 1 | CO2          |
|---------|---|---|--------------|
|         | given by  |   |              |
|         | (a) $\vec{H} = 2\Pi r I$  |   |              |
|         | (b) $\vec{H} = I/2\Pi r$  |   |              |
|         | (c) $\vec{H} = I/4\Pi r$  |   |              |
|         | (d) $\vec{H} = 4\Pi r/I$  |   |              |
| 1(vii)  | Displacement current can flow through   | 1 | CO3          |
|         | (a) Capacitor   |   |              |
|         | (b) Inductor  |   |              |
|         | (c) Resistor  |   |              |
| 1(viii) | (d) None of these<br>Which of the following is not Manuall's equation?                                | 1 | $CO^{2}$     |
| I(VIII) | Which of the following is not Maxwell's equation?   | 1 | CO3          |
|         | (a) $\vec{\nabla}.\vec{D} = \rho$<br>$\vec{\nabla}.\vec{D} = \vec{\rho}$                              |   |              |
|         | (b) ) $\vec{\nabla} \times \vec{E} = -\frac{\partial \vec{B}}{\partial t}$                            |   |              |
|         | (c) $\vec{\nabla} \times \vec{H} = J + \frac{\partial \vec{D}}{\partial t}$                           |   |              |
|         | (d) $\vec{\nabla} \cdot \vec{J} = -\frac{\partial \vec{\rho}}{\partial t}$                            |   |              |
| 1(ix)   | A transmission line of length $\frac{\lambda}{4}$ shorted at far end behaves like                     | 1 | CO4          |
|         | (a) Series resonant circuit   |   |              |
|         | (b) Parallel resonant circuit   |   |              |
|         | (c) Pure inductor   |   |              |
| 1()     | (d) Pure capacitor  | 1 | 004          |
| 1(x)    | The direction of propagation of electromagnetic waves is given by the direction of                    | 1 | CO4          |
|         | (a) $\vec{E}$   |   |              |
|         | (a) $\vec{E}$<br>(b) $\vec{H}$  |   |              |
|         | (b) $\vec{H}$<br>(c) $\vec{E} \times \vec{H}$   |   |              |
|         | (d) None of these   |   |              |
| 1(xi)   | Electric field in a region containing space charges can be found using                                | 1 | CO2          |
|         | (a) Laplace's equation  | _ |              |
|         | (b) Poisson's equation  |   |              |
|         | (c) Coulombs law  |   |              |
| 17      | (d) Helmholtz equation  | _ | <b>a a i</b> |
| 1(xii)  | Stoke's theorem transforms the  | 1 | CO1          |
|         | <ul><li>(a) Line to volume integral</li><li>(b) Volume to surface integral</li></ul>                  |   |              |
|         | (c) Surface to volume integral  |   |              |
|         | (d) Surface to line integral  |   |              |
|         |   |   |              |

## **GROUP – B**

(Short Answer Type Questions) (Answer any *three* of the following)  $3 \times 5 = 15$ 

| 2.             | $\rightarrow \rightarrow \partial \vec{D}$  | Marks<br>5 | CO No<br>CO3 |
|----------------|---|------------|--------------|
|                | Prove that $\nabla \times \vec{H} = \vec{J} + \frac{\partial \vec{D}}{\partial t}$ , the symbols having usual meaning.  |            |              |
| 3.             | Starting from Gauss's theorem of electro-statics, derive the Poisson's and Laplace's equation.  | 5          | CO2          |
| 4.             | State and explain Helmholtz Theorem.  | 5          | CO1          |
| 5.a)           | Write down Magnetic scalar potential & magnetic vector potential.   | 3          | CO2          |
| 5.b)           | Find the location of the point $(1, 2, 3)$ in cylindrical co-ordinates.   | 2          | CO1          |
| 6.             | Write down the primary and secondary parameters of a transmission<br>line. Express the secondary parameters in terms of primary<br>parameters.  | 5          | CO4          |
|                | GROUP – C   |            |              |
|                | (Long Answer Type Questions)<br>(Answer any <i>three</i> of the following) 3 x 15   | 5 – 45     |              |
|                |   | Marks      | CO No        |
| 7. a)          | Write and explain differential & integral forms of Maxwell's equations.   | 10         | CO3          |
| 7. b)          | Find the conduction and displacement current densities in a material having conductivity of $10^{-3}$ s/m and $\varepsilon_r = 2.5$ if the electric field in the material is $E = 5.0 \times 10^{-6} \sin(9.0 \times 10^9 t) v/m$ | 5          | CO2          |
| 8.a)           | Explain the significance of Transformer and Motional EMF.   | 8          | CO3          |
| 8.b)           | A transmission line operating at 500 MHz has $Z_o = 80\Omega$ , $\alpha = 0.04$ Np/m, $\beta = 1.5$ rad/m. Find the line parameters R, L, G & C   | 7          | CO4          |
| 9.a)           | Deduce boundary conditions on electric vector $\vec{E}$ and $\vec{D}$ for dielectric-<br>dielectric interface.  | 7          | CO2          |
| 9.b)           | A plane polarized wave is travelling along Z-axis. Show that $\frac{E_y}{H_z} = 377\Omega$  | 8          | CO4          |
| 10.a)          | What is Poynting Vector? Prove that Poynting vector gives the power<br>flow per unit area of cross-section, at a point in the medium.   | 10         | CO4          |
| 10.b)          | Derive Biot-Savart's law from magnetic vector potential.  | 5          | CO2          |
| 11.            | Write short notes on any <i>three</i> of the following:   |            |              |
| 11.a)          | Faraday's law of electromagnetic induction  | 5          | CO2          |
| 11.b)          | Divergence and Curl   | 5          | CO1          |
| 11.c)          | Stoke's Theorem   | 5          | CO1          |
| 11.d)<br>11.e) | Coulombs law in vector form   | 5<br>5     | CO2          |
| 11.0)          | Displacement Current  | 3          | CO3          |
